

Práctica: Flujo de trabajo en Git

Actividad: Práctica de paso de MR entre ambientes

Aprendiz: Valentina Cruz

Instructor: Jesus Ariel

SENA – Centro de Formación en Tecnologías de la Información

Programa: Análisis y Desarrollo de Software

Ficha: 2899747

Fecha: 13 de agosto de 2025

Práctica: Creación y gestión de ramas en Git con flujo dev → qa → staging → main

1. Se listan las ramas locales y remotas para verificar el estado del repositorio.

```
C:\Users\karol\ADS0-2899747--Valentina>git branch -a
dev
* main
remotes/origin/HEAD -> origin/main
remotes/origin/activity
remotes/origin/dev
remotes/origin/feature/practica-mr
remotes/origin/main
remotes/origin/qa
remotes/origin/staging
```

2. Inicialmente intenté eliminar la rama remota dev, pero dio error porque ya había sido eliminada en el repositorio remoto.

Se usó:

```
C:\Users\karol\ADS0-2899747--Valentina>git push origin --delete dev
error: unable to delete 'dev': remote ref does not exist
error: failed to push some refs to 'https://github.com/valentinacruzr/ADS0-2899747--V
alentina.git'

C:\Users\karol\ADS0-2899747--Valentina>git fetch --prune
From https://github.com/valentinacruzr/ADS0-2899747--Valentina
- [deleted]      (none)      -> origin/dev
- [deleted]      (none)      -> origin/feature/practica-mr
- [deleted]      (none)      -> origin/qa
- [deleted]      (none)      -> origin/staging
```

para limpiar referencias a ramas remotas eliminadas.

3. Crear y subir nuevamente la rama dev desde main y se subió al repositorio remoto.

```
C:\Users\karol\ADS0-2899747--Valentina>git push -u origin dev
Total 0 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
remote:
remote: Create a pull request for 'dev' on GitHub by visiting:
remote:   https://github.com/valentinacruzr/ADS0-2899747--Valentina/pull/new/dev
remote:
To https://github.com/valentinacruzr/ADS0-2899747--Valentina.git
 * [new branch]      dev -> dev
branch 'dev' set up to track 'origin/dev'.

C:\Users\karol\ADS0-2899747--Valentina>git checkout main
Switched to branch 'main'
Your branch is up to date with 'origin/main'.
```

4. Se crearon las ramas qa y staging; cada rama se creó desde main y se envió a GitHub para seguir el flujo de trabajo.

```
C:\Users\karol\ADS0-2899747--Valentina>git checkout main
Switched to branch 'main'
Your branch is up to date with 'origin/main'.

C:\Users\karol\ADS0-2899747--Valentina>git checkout -b qa
Switched to a new branch 'qa'

C:\Users\karol\ADS0-2899747--Valentina>git push -u origin qa
Total 0 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
remote:
remote: Create a pull request for 'qa' on GitHub by visiting:
remote:   https://github.com/valentinacruzr/ADS0-2899747--Valentina/pull/new/qa
remote:
To https://github.com/valentinacruzr/ADS0-2899747--Valentina.git
 * [new branch]      qa -> qa
branch 'qa' set up to track 'origin/qa'.

C:\Users\karol\ADS0-2899747--Valentina>git checkout main
Switched to branch 'main'
Your branch is up to date with 'origin/main'.

C:\Users\karol\ADS0-2899747--Valentina>git checkout -b staging
Switched to a new branch 'staging'

C:\Users\karol\ADS0-2899747--Valentina>git push -u origin staging
Total 0 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
remote:
remote: Create a pull request for 'staging' on GitHub by visiting:
remote:   https://github.com/valentinacruzr/ADS0-2899747--Valentina/pull/new/stagi
ng
remote:
To https://github.com/valentinacruzr/ADS0-2899747--Valentina.git
 * [new branch]      staging -> staging
branch 'staging' set up to track 'origin/staging'.
```

5. Cree rama de feature Se creó una rama para trabajar en la práctica específica.

```
C:\Users\karol\ADS0-2899747--Valentina>git checkout -b feature/practica-mr
Switched to a new branch 'feature/practica-mr'

C:\Users\karol\ADS0-2899747--Valentina>git push
fatal: The current branch feature/practica-mr has no upstream branch.
To push the current branch and set the remote as upstream, use

    git push --set-upstream origin feature/practica-mr

To have this happen automatically for branches without a tracking
upstream, see 'push.autoSetupRemote' in 'git help config'.

C:\Users\karol\ADS0-2899747--Valentina>git push -u origin feature/practica-mr
Total 0 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)
remote:
remote: Create a pull request for 'feature/practica-mr' on GitHub by visiting:
remote:   https://github.com/valentinacruzr/ADS0-2899747--Valentina/pull/new/featu
re/practica-mr
remote:
To https://github.com/valentinacruzr/ADS0-2899747--Valentina.git
 * [new branch]      feature/practica-mr -> feature/practica-mr
branch 'feature/practica-mr' set up to track 'origin/feature/practica-mr'.
```

6. Se generó un archivo Markdown con el título y una breve descripción.

```
C:\Users\karol\ADSO-2899747--Valentina>echo "# Práctica MR" > practica-mr.md

C:\Users\karol\ADSO-2899747--Valentina>echo "Simulación del flujo dev → qa → staging
→ main" >> practica-mr.md

C:\Users\karol\ADSO-2899747--Valentina>git add practica-mr.md
```

7. Se realizó el commit y se subieron los cambios a la rama.

```
C:\Users\karol\ADSO-2899747--Valentina>git commit -m "docs: add MR practice document"
[feature/practica-mr 99dda00] docs: add MR practice document
1 file changed, 2 insertions(+)
create mode 100644 practica-mr.md

C:\Users\karol\ADSO-2899747--Valentina>git push
